AKC Hunt Test

Please see separate premium list.

The Bracco Italiano Club of America ("BICA") will have a test on Friday, April 14, 2023 with Junior Hunter, Senior Hunter, Master Hunter beginning in the morning. The Test is open to all eligible pointing breeds.

For more information about the hunt tests, please visit:

<https://www.thebraccoclub.org/specialty>

CLOSING DATE FOR THE AKC HUNT TESTING EVENTS IS: 5:00PM Central Time April 1, 2023

CRUFTS QUALIFICATION

With the approval of BICA, The Kennel Club (of England) has designated that at the 2023 BICA National Specialty, the following winners will be eligible to enter Crufts 2024 & 2025 (in Birmingham, England) as a U.S. International qualifier. At the BICA 2023 National Specialty, the following awarded exhibits will receive an envelope in the ring with their trophies which includes the certificate to verify qualification. Participation at Crufts is optional and completely at the owner's expense.

Best of Breed
Select Dog
All Awards of Merit

Best of Opposite Sex to Best of Breed
Select Bitch
Select Dog Best Bred-By-Exhibitor

More details about participation, and entry forms, can be obtained on the Crufts web site — www.crufts.org.uk when they become available. To the extent the foregoing conflicts with the rules established by The Kennel Club, The Kennel Club's rules shall govern.

WELCOME MEET & GREET

* Parent Club Specialty Only

Award of Merit

The judge may select, at his/her discretion, up to three of the superior quality specimens from the intersex competition. These would not include those exhibits previously awarded Best of Breed, Best of Opposite Sex to Best of Breed or Select Dog/Bitch.

SCHEDULE OF POINTS

For complete Conformation Championship requirements see **Chapter 16** of the Rules Applying to Dog Shows

The Points toward a Championship shall be awarded to the Winners Dog and Bitch of each breed or variety based on the actual number of dogs or bitches competing in that breed or variety.

If the dog designated Winners Dog or Winners Bitch is also awarded Best of Breed or Variety, the dogs of both sexes that have been entered for Best of Breed or Variety competition and that have been defeated in such competition, shall be counted in addition to the dogs that competed in the regular classes for its sex in calculating championship points.

If the dog designated Winners Dog or Winners Bitch is also awarded Best of Opposite Sex to Best of Breed or Variety, the dogs of its own sex that have been entered for Best of Breed or Variety competition that have been defeated in competition for Best of Opposite Sex, shall be counted in addition to the dogs that competed in the regular classes for its sex in calculating championship points.

After points have been computed for Winners Dog and Winners Bitch subject to the above two stipulations, the dog awarded the Best of Winners shall be credited with the number of points calculated for Winners Dog or Winners Bitch, whichever is greater. If no points are available for the Best of Winners, the number of regular class dogs in both sexes are added together and compared to the point schedule. If the total sum of regular class dogs and bitches meets or exceeds the number of competitors needed for one point in its sex, the Best of Winners will receive one championship point.

In counting the number of eligible dogs in competition, a dog that is disqualified, or that is dismissed, excused or ordered from the ring by the judge, or from which all awards are withheld shall not be included. Any dog which shall have won fifteen points shall become a Champion of Record, if six or more of said points shall have been won at two shows with a rating of three or more championship points each and under two different judges, and some one or more of the balance of said points shall have been won under some other judge or judges than the two judges referred to above.

SCHEDULE OF POINTS FOR DIVISION 13 - EFFECTIVE MAY 10, 2022

Division 13 is comprised of: Idaho, Montana, Nebraska, Nevada, New Mexico, North Dakota, South Dakota, Utah, Wyoming.

Reserve Winners Bitch: Breed Hook

Best Junior Handler: 12" Leash Rack, offered by Amanda Inman

Reserve Junior Handler: Breed Hook

OFFICIAL STANDARD OF THE BRACCO ITALIANO

General Appearance: Of strong and harmonious construction, powerful appearance. The preferred subjects are smooth coated, with lean limbs, well-developed muscles, well defined lines, and a markedly sculpted head with very obvious chiseling under the eyes. These elements all contribute to give distinction to this breed. The Bracco is tough and adapted to all types of hunting, reliable, docile, and easy to train.

Size, Proportion, Substance: Height at the withers between 21 to 27 inches. Preferred size for males: 23 to 27 inches; preferred size for females: 21 to 25 inches. Weight between 55 to 90 pounds, depending on height. Height at the withers less than 21 inches after 12 months of age is a disqualification. Height greater than 27 inches is a disqualification. The Bracco is a solidly built dog with powerful bone, but without lumber, and without sacrificing balance and harmonious appearance. A dog in hard and lean field condition is not to be penalized.

Important Proportions: The body is square or slightly longer than tall. Length of head is equal to two-fifths (40 percent) of the height at the withers; its width, measured at the level of the zygomatic arches, is less than half its length. Skull and muzzle are of equal length.

Head: Head - Angular and narrow at the level of the zygomatic arches, its length corresponds to two-fifths (40 percent) of the height at the withers; the middle of its length is at the level of a line that unites the inner angles of both eyes. The upper planes of the skull and muzzle are divergent, i.e.: if extended, the top line of the muzzle emerges in front of the occiput, ideally at mid-length of the skull (down-faced). Dish face (convergence of the planes of the skull and muzzle) is a disqualification. The head and neck are moderate in skin. The head should have a soft fold of skin from the outer corner of the eye, falling down the cheek. When the head is down and relaxed, there is a skin fold across the skull from ear to ear. Eyes - Semi-lateral position, neither deep set nor prominent. Eyes fairly large, eyelids oval-shaped and close-fitting (no entropion or ectropion). The iris is a dark amber to orange or brown color depending on the color of the coat. Wall eye is a disqualification. Expression is soft, gentle and intelligent. Ears - Well developed. In length they should, without being stretched, reach the tip of the nose. Their width is at least equal to half their length; raised only very slightly; base rather narrow, set at level of zygomatic arches. A supple ear with a front rim well-turned inwards to frame the face; the lower extremity of the ear ends in a slightly rounded tip. Skull Region: Seen in profile, the skull shape is a very open arch. Seen from the top, it forms lengthwise an elongated oval. The width of the skull measured at the level of the zygomatic arches should not exceed half the length of the head. Cheeks are lean, the bulge of the forehead and the supra-orbital ridges are perceptible. The stop is not pronounced. The frontal groove is visible and ends at mid-length of the skull. The interparietal crest is short and not very prominent. The occiput is pronounced. Muzzle - Foreface is either straight or slightly arched. Its length is equal to half of the length of the head and its depth measures four-fifths (80 percent) of its length. Seen from the front, the lateral sides of the muzzle converge slightly, still presenting a fore-face of good width. The chin is not very apparent. Nose - Voluminous, with large well-opened nostrils, protrudes slightly over the lips with which it forms an angle. Color brown or from pale pink to more or less deep fleshy red depending on the color of the coat. A split nose is a disqualification. Lips - Upper lips well developed, thin and floppy without being flaccid, covering the jaw; seen in profile, they overlap the lower jaw slightly, seen from the front, they form an inverted "V" below the nose; the corner of the lips must be marked without being droopy. Teeth - Dental arches well adapted, with the teeth square to the jaw. Bite - scissor or level. Any deviation (overbite or underbite) should be faulted in accordance to its severity.

Neck, Topline, Body: Neck - Powerful, in truncated cone shape. Length of the neck is at least two-thirds but not greater than the length of the head. Well detached from the nape. The throat shows a soft double dewlap. Excessive skin with exaggerated wrinkling or single dewlap is faulted. Topline - The upper profile of the back is made up of two lines: one, almost straight, slopes from the withers to the 11th dorsal vertebrae (mid-back); the other is slightly arched, joining with the line of the croup. Body - Chest is broad, deep and well down to level of the elbows, without forming a keel. Ribs well sprung, particularly in their lower part, and sloping. Wide lumbar region. Loin is well muscled, short and slightly convex. Croup is long (about onethird of the height at the withers), wide and well-muscled; the pelvic angulation (angle formed by the pelvic girdle with a horizontal line) is 30 degrees. Underline - Lower profile almost horizontal in its rib cage part, rising slightly in its abdominal part. Tail - Thick at the base,

straight, with a slight tendency to taper, hair short. When the dog is in action and especially when questing, is carried horizontally or nearly. Docked - Should be docked 6 to 10 inches from the root. Undocked - Carried horizontally; length of the undocked tail is to the hock. May be slightly curved but never held high or carried bent over the back.

Forequarters: Withers are well defined, with the points of the shoulder blades well separated. Shoulder strong, well-muscled, long, sloping, and well laid back, very free in its movement. The upper arm sloping, fitting to the rib cage. Forearm strong, straight, with well-marked sinews; the point of the elbows should be on a perpendicular line from the rear point of the shoulder blade to the ground. Metacarpus (pastern) well proportioned, lean, of good length and slightly sloping. Feet strong, slightly oval shaped, well arched and closed toes with strong nails well curved towards the ground. Color of nails is white, yellow or brown, of a more or less dark shade depending on the color of the coat. Foot pads elastic and lean.

Hindquarters: In balance with the forequarters. Thigh long, parallel, muscular, with the rear edge almost straight when viewed from the side. Strong limbs; hocks wide, metatarsals (rear pasterns) relatively short and lean. The feet, with all the characteristics of the front feet, have dewclaws, the absence of which is not a fault. Double dewclaws are tolerated.

Coat: Skin - Ample skin, tough but elastic, well separated from the tissues underneath; fine on the head, the throat, inside the elbows, and on lower part of the body. The visible mucous membranes must be a corresponding color with the coat, but never show black spots. The mucous membranes of the mouth are pink; sometimes with light brown spotting. Coat - Short, dense and glossy, fine and shorter on the head, the ears, front part of the legs and feet.

Color: The base color is white. The colors acceptable in this breed are: solid white, white with orange markings, or white with brown markings. The markings are of varied sizes (patches, ticking, or roan). A symmetrical face mask is preferred, but the absence of a mask is tolerated. The orange color can range from a dark amber to rich orange. It is not lemon or yellow. The Brown color is a warm shade that recalls the color of a monk's frock (Crayola Brown); it is not liver. A metallic sheen is appreciated in brown and white dogs. Disqualifying colors - Tricolor, or with tan markings, fawn, hazel. Any trace of black on coat or mucous membranes. Any solid color other than white. Albinism.

Gait: Extended and fast trot, with powerful reach and drive. Head raised, nose held high in such a way that, when hunting, the nose is higher than the topline as if the dog is being "pulled along by the nose." The fluid, powerful, and extended trot is a hallmark of this breed.

Temperament: The Bracco is tough and adapted to all types of hunting, reliable, docile, and intelligent. Friendly, not shy, never aggressive, and readily makes eye contact. Extreme shyness is a fault. Aggressiveness is a disqualification.

Fault: Any departure from the foregoing constitutes a fault which when judging must be penalized according to its seriousness and its extension.

Disqualifications:

Height at the withers less than 21 inches after 12 months of age.

Height greater than 27 inches.

Dish face (convergence of the planes of the skull and muzzle).

Wall eye.

Split nose.

Tricolor, tan markings, fawn or hazel color.

Any trace of black on coat or mucous membranes.

Any solid color other than white.

Albinism.

Aggressiveness.

Approved October 8, 2018

Effective July 3, 2019
